

Power Supply: 380V 3P 5Wires
 Frequency: 50HZ
 Power: 3kW

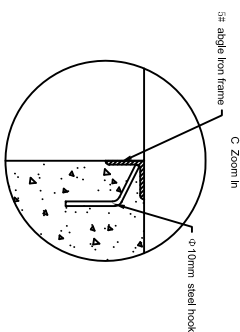

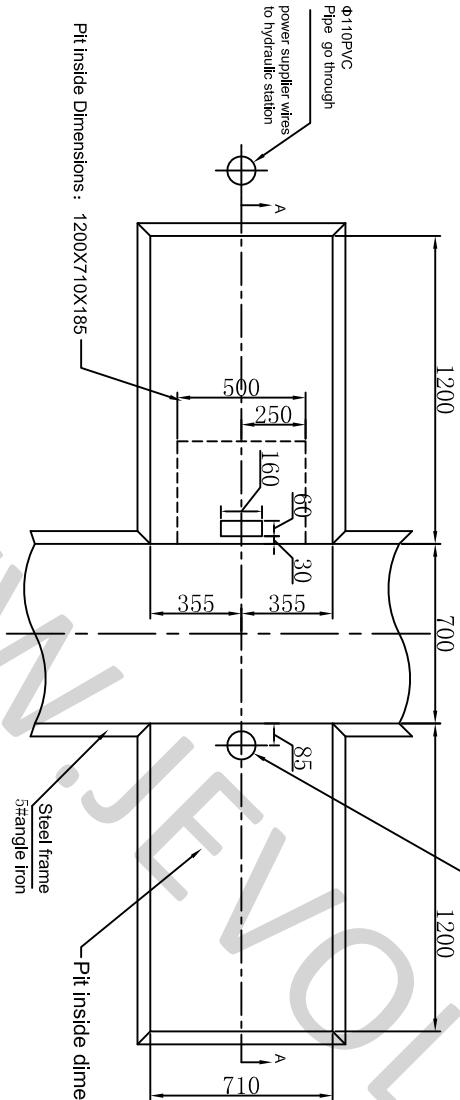

A-A

B-B

Bench Dimensions
 (1200 × 800 × 220) × 2

Pit inside Dimensions : 1200X710X185

Construction Requirements:

- 1、The bottom D should be smooth and flatness error less than 2mm; diagonal line error less than 2mm;
- 2、The pit load more than 15T the concrete thickness ≥ 450 mm, Intensity > 45 MPA;
- 3、Considering water-proof and water-drainage;
- 4、The pre-bury angle iron should be smooth and tight (after concrete the angle iron frame should be in same line with earth), the hook should be welded with angle iron then bury to concrete;
- 5、The buried pipe should be clean and go through with iron wire for pulling wires to the station.

NOTES: The pit height is 185mm, the machine will not running is not this size !
